

# Gordon E. Jones Distinguished Achievement Award

The Gordon E. Jones Distinguished Achievement Award, previously The School of Sciences and Mathematics Distinguished Achievement Award, is made to an SSM faculty member in recognition of a particularly outstanding achievement in the area of teaching, research, or service, or an extraordinary combination in these areas.

Faculty can be nominated by chairs, by other faculty members, or by themselves. Letters of nomination should describe, in a one-page statement, either (a) the candidate's most outstanding achievement in teaching, research, or service for the period beginning May 15 of the previous year; or (b) the candidate's outstanding combination of achievements in all three of the areas of teaching, research, and service for the one-year period. While the award may be given based on achievement in only one area, evidence of general effectiveness across the three areas of teaching, research, and service is necessary.

The award, consisting of a plaque and a monetary gift pending the availability of funding, is presented to the recipient at the School's spring picnic.

Recipients include:

1994 Elizabeth Martin, Department of Chemistry and Biochemistry
